AMP

ONLINE AIRCRAFT MAINTENANCE TRACKING SERVICE

AMP is an online aircraft maintenance tracking service. It has a central aircraft maintenance scheduling system – which means no schedule building required on the client's side

AMP provides accurate tracking, which helps the operator and AMO with the planning and tracking of aircraft maintenance. This means less down time for the aircraft and more productivity for the AMO. AMP offers a variety of helpful features:

- Generates full aircraft status reports based on live maintenance data
- Generates work packs
- Tracking of component movement
- SB's, AD's and Manual Revisions tracked by Avdex and notified to client when the AMP Schedule is updated
- Tracking Usage of an aircraft
- Online recording of maintenance compliance
